# LETTER OF RECOMMENDATION

Howard Lorin  
Founder, CEO  
pidgeon.cc

To whomever this letter concerns,

Starting your own company is always extremely difficult and finding the correct people for the jobs you need to fill takes time and stress. However, Alexandre Sammut consistently over-delivered on every assignment handed to him. He always enjoyed doing the work and continued to enhance his skills and knowledge on every programming language he needed to use. There never was a day or assignment where I was disappointed in his work.

Alexandre utilized these following programming languages, HTML5, JavaScript, ReactJS, NodeJS (with expressJS and MongoDB).

Alexandre was also the person responsible for setting up offshore DNS server and connecting all of the backend with storj.io systems to work together flawlessly. Every vision I had, he was able to deliver.

I am based in the United States but I am bilingual with both English and French, so there was never any miscommunication between us when it came to either languages.
